

NASIMUDHEEN T

MERN Stack Developer | Full-Stack Web Applications

Kerala, India | nasimudheent22@gmail.com | +91 85476 36667 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with hands-on experience building and deploying scalable, production-ready full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in back-end server and database development, RESTful API design, and front-end technologies including React, Tailwind CSS, and shadcn/ui. Experienced in managing projects from conception to finished product in agile environments, collaborating cross-functionally to meet both technical and consumer needs. Demonstrates strong analytical and problem-solving aptitude, excellent time management, and a proactive approach to staying current with emerging web technologies and industry trends.

PROFESSIONAL EXPERIENCE

MERN Stack Developer – Zaky Soft

March 2025 – Present

- Developed and maintained back-end web applications and servers using Node.js and Express.js, ensuring reliability, scalability, and optimized database performance with MongoDB.
- Built and deployed full-stack applications using the MERN stack, managing projects from conception through to finished product, ensuring both technical excellence and consumer-facing quality.
- Developed Next.js applications leveraging SSR (Server-Side Rendering), SSG (Static Site Generation), and API Routes for optimized rendering and scalable performance.
- Designed and developed RESTful APIs, collaborating with front-end developers and cross-functional teams to establish objectives and deliver cohesive, functional solutions.
- Implemented OAuth and JWT-based authentication with role-based access control (RBAC) for secure API endpoints, meeting both technical and consumer security needs.
- Integrated server-state management using TanStack Query, reducing redundant API calls and improving data-fetching performance by 30%.
- Built responsive, cross-platform-optimized front-end interfaces using React.js, HTML5, CSS3, Tailwind CSS, and Bootstrap, ensuring full mobile and desktop responsiveness.
- Compiled, analyzed, and debugged code and processes to troubleshoot problems and identify areas for improvement across multiple application modules.
- Participated in code reviews and agile sprint cycles, contributing to knowledge-sharing sessions that supported team growth and enhanced interpersonal collaboration.
- Monitored industry developments and emerging web technologies to develop ideas for new programs, products, and features.

PROJECTS

Client Dashboard – Next.js Performance-Optimized Web Application

- Developed a production-ready full-stack dashboard using Next.js (App Router) with SSR and SSG for optimized rendering, structured routing, and scalable back-end API integration.
- Built reusable, accessible UI components using shadcn/ui and Tailwind CSS following design system principles; ensured full cross-platform optimization and responsiveness.
- Integrated RESTful APIs and managed async server-state using TanStack Query for efficient caching and data handling.

EZZone – Full-Stack Event Booking Platform

- Developed a complete full-stack application using the MERN stack with secure back-end server architecture and JWT-based authentication.
- Built and designed REST APIs for event and booking management; implemented responsive, cross-device-optimized UI for seamless consumer experience.

BugTracker – Issue Tracking & Chat Application

- Designed and developed back-end APIs using Express.js and MySQL with a structured, scalable database schema for issue management.
- Developed React-based dashboard and integrated real-time data updates for improved user workflow and analytical visibility.

Task Collaboration Portal – Role-Based Project Management System

- Built a full-stack collaboration system from conception to deployment with Admin, Developer, and Client dashboards for project tracking and progress management.
- Implemented authentication and role-based access control (RBAC) with secure API endpoints and relational MySQL database schema.
- Developed REST APIs and integrated front-end dashboards for project assignment, status updates, and file attachments.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router, SSR, SSG, API Routes), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, Bootstrap

Backend Development: Node.js, Express.js – server creation, back-end architecture, and API development

Databases: MongoDB, MySQL – schema design, query optimization, and database management

API Development: RESTful APIs, Axios, Fetch API

Authentication: JWT, OAuth, Session-based Authentication, Role-Based Access Control

State Management: Redux, Context API, TanStack Query, Zustand

Version Control: Git, GitHub

Tools & Practices: Postman, Chrome DevTools, Agile, Code Reviews, Component Lifecycle

Professional Skills: Analytical & Problem-Solving, Time Management, Cross-functional Collaboration, Communication

EDUCATION

Bachelor of Computer Applications (BCA)

University of Calicut, Kerala

2021 – 2024
